Exercise 6: 2D Composite Transformations and Windowing in C++ using OpenGL

Objective:

To compute the composite transformation matrix for any 2 transformations given as input by the user and applying it on the object.

Code:

```
#ifndef LOPENGL_H
#define LOPENGL_H

#include <GL/freeglut.h>
#include <GL/gl.h>
#include <GL/glu.h>
#include <math.h>
#include <stdio.h>
#include<iostream>
#include<vector>
#include<ctime>
using namespace std;

#endif
```

```
#ifndef LUTIL_H
#define LUTIL_H

#include "Headers.h"

//Screen Constants
const int SCREEN_WIDTH = 640;
const int SCREEN_HEIGHT = 480;
const int SCREEN_FPS = 60;
const int POINT_SIZE=3;

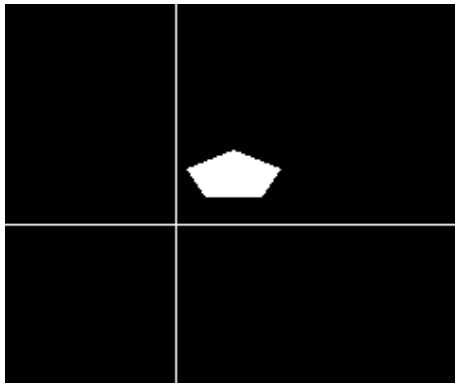
Output:

Original Image:
Choose number of edges: (1 for line, 3 and upwards for polygon): 5
Enter vertices:
Vertex 1 (x,y): 30 30
Vertex 2 (x,y): 10 60
Vertex 3 (x,y): 60 80
Vertex 4 (x,y): 110 60
Vertex 5 (x,y): 90 30
Number of edges: 5



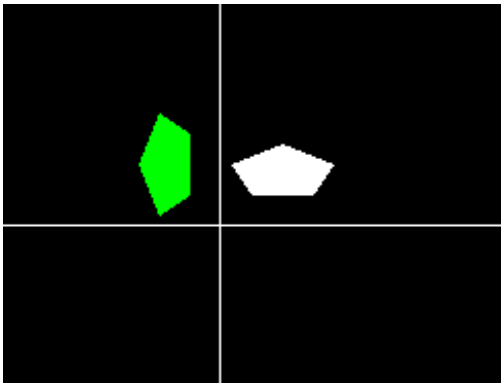
First transform: Translation

Choose first transformation:
1 for Translation
2 for Rotation
3 for Scaling
4 for Reflection
5 for shearing
0 to Exit
Enter your choice: 1

Enter the translation factor for X and Y: 40 40

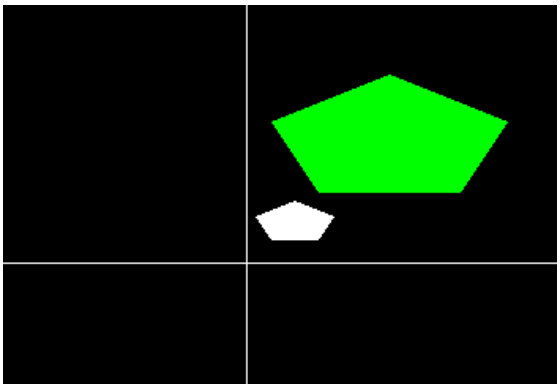
Second Transform: Rotation

Enter the rotation angle: 90
Enter point about which to be rotated: 0 0



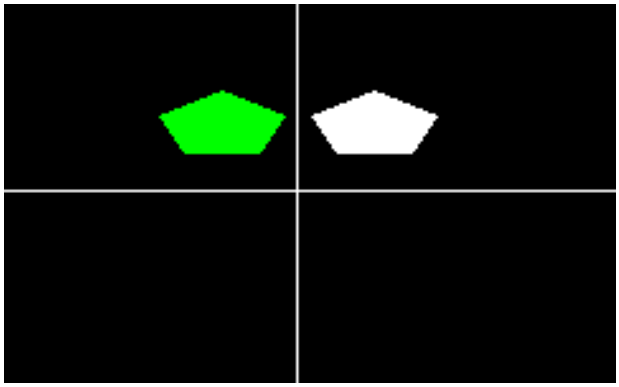
Second Transform: Scaling

Enter the scaling factor for X and Y: 3 3
Enter point about which to be scaled: 0 0



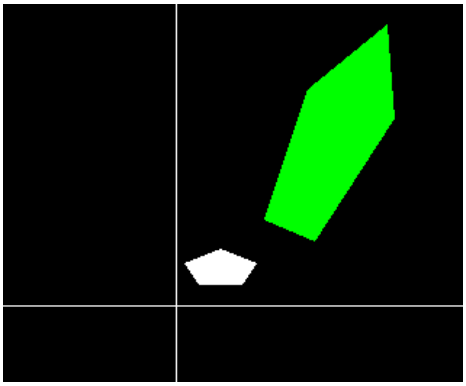
Second Transform: Reflection

Enter the angle with X-axis and Y-intercept of the mirror: 90 0



Second Transform: Shearing

Enter the shearing factor for X and Y: 3 3

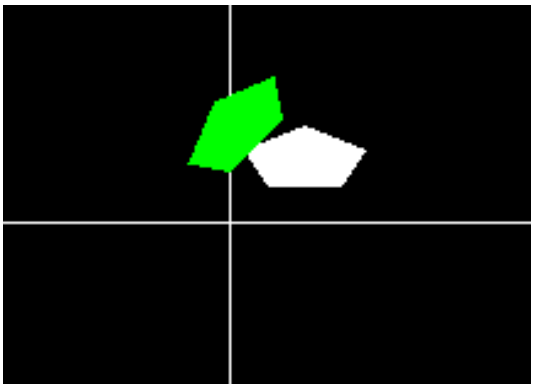


First transform: Rotation

Choose first transformation:
1 for Translation
2 for Rotation
3 for Scaling
4 for Reflection
5 for shearing
0 to Exit
Enter your choice: 2
Enter the rotation angle: 45
Enter point about which to be rotated: 0 0

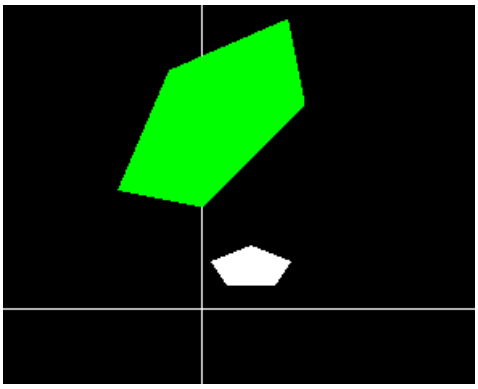
Second Transform: Translation

Enter the translation factor for X and Y: 50 50



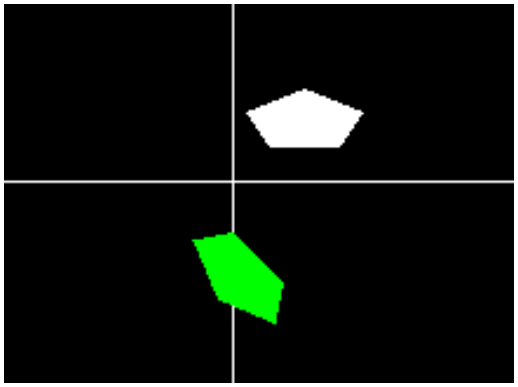
Second Transform: Scaling

Enter the scaling factor for X and Y: 3 3
Enter point about which to be scaled: 0 0



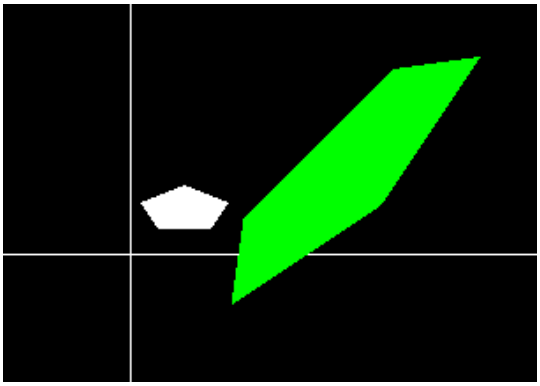
Second Transform: Reflection

Enter the angle with X-axis and Y-intercept of the mirror: 0 0



Second Transform: Shearing

Enter the shearing factor for X and Y: 3 3



First transform: Scaling

Choose first transformation:

Enter the scaling factor for X and Y: 3 3
Enter point about which to be scaled: 0 0

Second Transform: Reflection

Enter the angle with X-axis and Y-intercept of the mirror: 0 0

Objective:

Create a window with any 2D object and a different sized viewport. Apply window to viewport transformation on the object. Display both window and viewport.

Code:

```
